

SAMEERKUMAR SHAGA

Cincinnati, OH | 334-233-7454 | sameer.shaga06@gmail.com

SUMMARY

Experienced SAP integration specialist with over 7 years (total 9 years of IT experience) of expertise, including hands-on SAP PO/SAP CPI consulting, enterprise automation, and Generative AI platform delivery. Skilled in designing, developing, and implementing integration flows (iFlows) on SAP BTP Cloud Platform Integration, configuring and extending standard iFlows, building custom exception handling, and integrating via SOAP, REST, IDoc, SFTP, and OData adapters. Demonstrated ability to design scalable, secure integration solutions across on-premise and cloud landscapes, act as a liaison between business and technical teams, and mentor junior consultants. Recognized for streamlining business processes and enhancing operational efficiencies through strategic cloud, API, and AI-powered integrations. Actively tracks emerging SAP and AI technologies, including SAP Joule, Agentic AI workflows, and LLM-based automation, incorporating them into solution offerings to drive differentiation, innovation, and forward-looking value for clients. Ready to leverage extensive technical and AI/ML skills to architect robust SAP BTP, CPI, API Management, and Generative AI solutions.

SKILLS

Languages: Python, C/C++, Java, JavaScript, PL/SQL

SAP Integration: SAP BTP / Cloud Platform Integration (CPI), SAP Process Orchestration (PI/PO), iFlow Design & Configuration (standard & custom), API Management (APIM), SAP Cloud Connector, CPI Cockpit, Groovy Scripting, Value Mapping, Message Mapping (Graphical, Java, XSLT), Adapters (SOAP, REST/HTTP, SFTP, IDoc, OData, SFSF, Process Direct), Integration Patterns (Enricher, Splitter, Content Modifier, Message Transformation), Exception & Local/Global Sub-Process Handling, EDI Integration, Security Artifacts (Encryption/Decryption, SSH Keys, Keystore Management), SAP NetWeaver, SAP BPM

Generative AI & ML: Agentic AI Workflows, LLM Fine-Tuning, Google Gemini (Multimodal), Prompt Engineering, Vector Search, Retrieval-Augmented Generation, Multi-Cluster Processing (MCP) on Kubernetes, TensorFlow, scikit-learn, PyTorch, DeepHyperX

Tools & Integration: AWS, GitHub, UI Path, Dell Boomi (Certified), Pega PRPC (Trained), CI/CD Pipelines, Kubernetes

Databases: Postgres, MySQL, DB2, Oracle

DevOps & Process: DevOps Practices

Management: Stakeholder Management, Client Handling, Junior Consultant Mentoring

WORK EXPERIENCE

Nantez

Aug 2025 - Present

Generative AI Consultant — Cincinnati, OH

- Designed and deployed a modular Generative AI platform at Nantez's client for enterprise knowledge retrieval, automated reporting, and insights generation.
- Contributed to advancing the client's data-driven decision-making and operational efficiency through AI-powered analytics.
- Developed scalable, high-availability ML pipelines across distributed Kubernetes clusters using multi-cluster processing (MCP) and implemented Agentic AI workflows for autonomous document summarization and research insights.
- Fine-tuned LLMs and integrated Google Gemini for multimodal content creation and regulatory reporting.
- Delivered efficient, reproducible, and secure AI/ML operations by combining Python-based automation, vector search, prompt engineering, and CI/CD pipelines.

Whole Foods Market

Apr 2024 - Aug 2025

ETL Developer, Contract — Loveland, OH

WWGS (World Wide Grocery Stores) Data and Analytics team leveraged a proprietary tool called Everclear—a low-code, configurable platform designed for building analytics and transactional applications with integrated workflows—to support end-to-end data integration.

- Engineered an end-to-end email analysis system using Python, VS Code, Claude Code extension, and BERTopic to process 1 year of historical support queries, featuring automated categorization and interactive visualizations that reduced response times and improved topic classification accuracy by 25%.

- Developed an ETL pipeline with Alteryx to transfer data from an SFTP server to a Teradata database, which was subsequently utilized by Everclear and automated on a scheduled basis.
- Provided production support for multiple business-critical applications on a rotating basis; offered technical assistance to stakeholders, led training sessions for cross-functional teams and end-users, and resolved data ingestion issues—including zero-row loads, duplicate records, and schema mismatches—by refining SQL logic and implementing robust validation rules.
- Coordinated with upstream data providers to define SLAs and data formats for SKU-level sales, inventory, and distribution data; developed SQL queries to support business analysis related to trends and space management; and led routine pipeline health checks, standardized Jira ticketing processes, and authored detailed runbooks to improve operational excellence.

City of Montgomery

Jun 2023 - Jul 2023

Intern at IT Department — Montgomery, AL

- Developed and deployed a Python script to automate filtering crucial information from flat files, reducing manual workload and saving the team over 100 hours per month, which improved operational efficiency.
- Analyzed the IT environment of downtown Montgomery in a report for Mayor Steven Reed, earning appreciation from Tony B. Porterfield, Chief Technology Officer, for consistently exceeding expectations.

Infosys LTD

Dec 2021 - Aug 2022

MS Dynamics CRM Consultant, Client: DNVEnergy — Hyderabad, India

- Orchestrated the integration of DocuSign into DNVEnergy portals, reducing average turnaround time by 9 days compared to paper signing processes and achieving financial savings of \$36 per document.
- Developed and implemented a DocuSign third-party integration using C# and API integration to enable automated document signing and data synchronization, utilizing NuGet packages for DocuSign and JSON Web Tokens (JWT) for secure envelope authorization.
- Integrated online application data into DocuSign templates and automated email notifications to signers; employed Windows Task Scheduler and the DocuSign API to retrieve signed documents and store them in a database.
- Automated application submission and data synchronization with Microsoft CRM using Azure Service Bus, streamlining workflows and improving operational efficiency while mentoring team members in best practices for API integration.

Infosys LTD

Dec 2019 - Dec 2021

SAP PO Consultant, Client: Dowjones — Hyderabad, India

- Collaborated with Dowjones to understand business needs and project requirements, focusing on designing scalable integration solutions for newspaper and publishing operations.
- Designed, developed, and implemented integration flows (iFlows) on SAP BTP – Cloud Platform Integration (CPI), configuring and extending standard iFlows and building custom iFlows with local and exception sub-processes to minimize manual intervention and ensure reliable message exchange.
- Built inbound and outbound interfaces between on-premise SAP systems and cloud applications using SAP CPI adapters (SOAP, REST/HTTP, SFTP, IDoc, Process Direct), applying web services API programming (REST, SOAP, XML, JSON) and mapping styles (Graphical Mapping, Java Mapping, Groovy Script, XSLT Mapping).
- Developed Groovy scripts and value mapping within iFlows to handle data format conversions (JSON to XML, CSV to XML) and complex transformation logic, leveraging CPI integration patterns such as message transformation, enricher, and splitter.
- Utilized SAP API Management (APIM) to design, expose, and secure APIs, and configured SAP Cloud Connector to establish secure, encrypted connectivity between cloud integration flows and on-premise SAP landscapes, including handling of security artifacts and SSH keys.
- Managed SAP PI/PO support estimates, SAP S/4 upgrades, and production support activities via the CPI Cockpit, monitoring message flows, analyzing interface issues, and providing root-cause solutions consistent with integration best practices.
- Acted as a liaison between Dowjones business stakeholders and the technical delivery team, proactively identifying business process and system enhancement opportunities and mentoring junior consultants on SAP PO/CPI development standards.

Infosys LTD

Dec 2017 - Dec 2019

SAP PO Consultant, Client: Southern California Edison — Hyderabad, India

- Implemented SAP PO to design and automate business processes at Southern California Edison, reducing manual intervention by integrating systems such as SAP NAS mount and NWBPM.

- Configured and extended standard iFlows and defined custom integration flows with cross-module interfaces, applying deep SAP PO expertise to develop integration solutions aligned with enterprise digital transformation objectives; collaborated with the onsite team to prepare technical specifications and testing documents using NWDS and Eclipse Luna.
- Developed custom EJB modules and configured SFTP and IDoc-based interfaces to meet integration requirements, implementing security artifacts including encryption/decryption mechanisms and SSH key management to ensure secure, scalable project go-live.
- Provided technical support and troubleshooting for business-critical applications, creating test data and executing test scripts to validate interface behavior, and monitoring system performance to identify continuous improvement opportunities.

Infosys LTD

Apr 2017 - Oct 2017

SAP PO Consultant, Client: PepsiCo and Archroma (50% allocation to each) — Hyderabad, India

- Developed a modern B2B integration landscape for PepsiCo, designing iFlows and configuring EDI-based integrations across multiple adapters to streamline data flow and automate business processes with trading partners, emphasizing best practices in secure and scalable integration design.
- Executed comprehensive DXI health checks for Archroma to ensure optimal SAP PI system performance and effective message handling, troubleshooting interface issues and contributing to continuous improvement initiatives in integration architecture.
- Actively contributed as a member of a team of 4 developers on a greenfield integration effort, supporting SAP PO development, interface design, and maintaining robust integration support across cross-module interfaces.

Infosys LTD

Sep 2015 - Mar 2017

SAP PO Consultant, Client: BASF — Hyderabad, India

- Contributed to the NewTP Hybris Ecommerce greenfield implementation project by developing integration scenarios and iFlows that seamlessly connected customer data between BASF's ecommerce portal, HANA DB, and BW, reflecting a strong foundation in enterprise integration design.
- Participated actively in requirements analysis, technical documentation, and interface creation for integrating Material Master data from the portal to HANA, applying cross-module knowledge and leveraging tools such as NetWeaver Developer Studio and Virtual Desktop.
- Worked as a dedicated member of a four-person team to ensure robust integration processes, providing solutions to business users based on reported issues and contributing to enhanced overall data flow and system performance.

EDUCATION

Auburn University at Montgomery Aug 2022 - Dec 2023

Masters, Computer Science — GPA: 4.0

- Achievements: Elected to The Honor Society of Phi Kappa Phi

National Institute of Technology Jul 2011 - May 2015

Bachelor of Technology, Chemical Engineering — GPA: 3.2

CERTIFICATIONS

- AWS Certified Cloud Practitioner — certified by Amazon, 2025
- Dell Boomi Certified Developer — certified by Dell Boomi
- Elements of AI — certified by MinnaLearn, 2023
- PL900 - MS Powerplatform — certified by Microsoft, 2021
- Python Programmer — certified by Microsoft, 2019
- Pega PRPC — Training Completed
